

Wanderlist

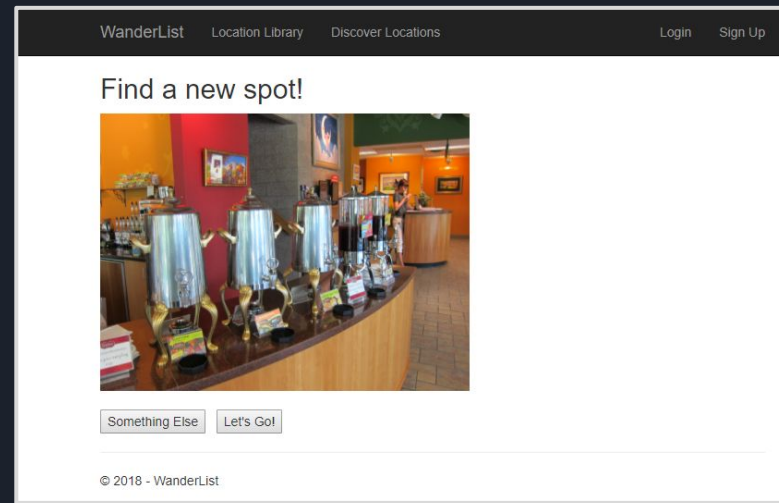

Team members:

Daniel Green, Gordon Gu, Gayathri Gude, Joanne Lui,
Zack Toelkes, Darian Valdez

Overview

- What
 - One-sided Tinder for Locations
- Who
 - Local tourism
 - Paradox of Choice
- How
 - Team wanted to incorporate local area
 - Entire team grasped concept

Breakdown

BREAKDOWN

1. User logs in or creates a user name
2. “Likes” or “Dislikes” locations
3. Once 5 “Liked” locations are selected, user is then taken to a final selection screen
4. Final selection screen displays the 5 “Liked” locations and user is prompted to pick a final location
5. Once picked, final location star rating is pulled up along with cost and map of location

The Sink	3	1165 13th St Boulder CO 80302	Bar on the Hill
The Bitter Bar	5	835 Walnut St Boulder CO 80302	Cocktail Bar

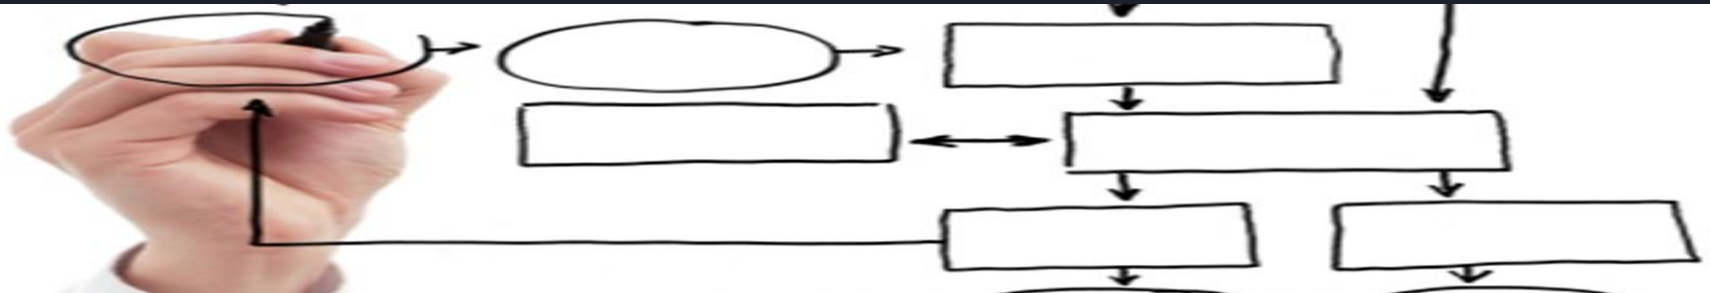

Infrastructure

- Project Tracker: Trello
 - Score: 5
- VCS Repository: GitHub
 - Score: 3
- Database: SQL Server 2012
 - Score: 4
- Platform: .NET Framework
 - ASP.NET MVC, Entity Framework
 - Score: 3
- IDE: Visual Studio
 - Score: 5, with github: 4
- Testing Tool: Wrote our own tests

Methodology

- Used an Agile methodology
 - Weekly meetings where we updated team on progress that was made
- Group development sessions
 - Worked on code and what the plan of attack will be for the upcoming week
- Build simple working product, then add features
- Parallel code where possible

Challenges

- Learning new languages: C#
- Organizing team meetings so everyone could be there the same day and time
- Pushing to GitHub through Visual Studio

Lessons learned

- Start early! It is easy to get behind with other classes going on
- Narrow focus until it can be expanded
- Learned how a full-stack MVC application works
- GitHub is difficult to work with
 - .gitignore tracking
 - GitHub inside Visual Studio is even more so

Future Visions

- Add different locations across Colorado
- Automate reviews and locations for any area you are in, similar to Tinder
- Personalize options based off of past choices
- Add budget information

FUTURE VISIONS
The World in Our Hands
